

## Press Release

### U3O8 Corp. announces \$1 million private placement

#### ***NOT FOR DISSEMINATION IN THE UNITED STATES OR FOR U.S. NEWSWIRES***

Toronto, Ontario – February 13, 2014 – **U3O8 Corp. (TSX: UWE; OTCQX: UWEFF)**, a Canadian-based company focused on exploration and development of uranium resources and associated commodities in South America, announces a non-brokered private placement of up to 7,692,307 units (the “Units”) at a price of \$0.13 per Unit for total gross proceeds of up to approximately \$1.0 million (the “Offering”). Insiders, who are among U3O8 Corp’s largest shareholders, intend to participate, directly or indirectly, in the Offering.

Each Unit shall consist of one common share of U3O8 Corp. (“Share”) and one share purchase warrant (“Warrant”). Each Warrant shall entitle the holder to purchase one Share at a price of \$0.18 for a period of 24 months from the closing date.

The securities issued and issuable pursuant to the Offering will be subject to a 4-month hold period. The Offering is subject to a number of conditions, including, without limitation, receipt of all regulatory approvals.

The net proceeds will be used to advance U3O8 Corp’s Laguna Salada Deposit in Argentina as a potential low-cost, near-term uranium producer including refining the beneficiation process, completing the preliminary economic assessment (PEA) and finalizing the definitive agreement to joint venture with Petromineras Chubut S.E., Chubut’s provincial resource company, as well as for exploration projects in Colombia and Guyana, and for general corporate purposes.

#### **About U3O8 Corp.**

U3O8 Corp. is focused on exploration and development of uranium resources and associated commodities in South America. The company’s uranium resources comprise three deposits defined in accordance with National Instrument 43-101 located in Colombia, Argentina and Guyana:

- **Berlin Deposit, Colombia** – a recent PEA shows that Berlin could be a zero cash cost uranium producer thanks to revenue from by-products of phosphate, vanadium, nickel, rare earths (yttrium and neodymium) and other metals occurring in the same deposit;
- **Laguna Salada Deposit, Argentina** – a near surface, free-digging uranium, vanadium deposit that is potentially amenable to low-cost mining and processing methods; and
- **Kurupung Deposit, Guyana** – an initial uranium deposit in a large emerging uranium district.

## **Forward-Looking Statements**

*Certain information in this release are forward-looking statements with respect to the proposed joint venture and development plans, economic potential and growth targets of U3O8 Corp's current projects. Forward-looking statements consist of statements that are not purely historical, including statements regarding beliefs, plans, expectations or intentions for the future, and include, but not limited to, statements with respect to: (a) a joint venture with the Chubut Government, (b) the low-cost, near-term production goal of Laguna Salada, (c) compliance with current Chubut mining law, (d) the Laguna Salada and Berlin PEAs, (e) beneficiation test work on Laguna Salada, (f) the market opportunities for uranium from Argentina, (g) the potential of the Kurupung district in Guyana, and (h) the Offering. Basis for such assumptions include that: (i) discussions with the Chubut Government will be favourable, (ii) actual results of our exploration, resource goals, metallurgical testing, economic studies and development activities will continue to be positive and proceed as planned, (iii) requisite regulatory and governmental approvals will be received on a timely basis on terms acceptable to U3O8 Corp., and (iv) economic, political, industry and capital market conditions will be favourable. However, such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements, including, but not limited to: (1) that a joint venture will not be formed with the Chubut Government, (2) timing and outcome of the PEA or that a mine will be achieved on the Laguna Salada Project in compliance with current Chubut mining law, (3) risks that a mine will not be achieved on the Berlin Deposit and other exploration projects, (4) that beneficiation test work will continue to be favourable and results from small scale metallurgical testing can be duplicated on a larger scale, (5) the inherent uncertainties and speculative nature associated with exploration results, resource estimates, potential resource growth, future metallurgical test results, changes in project parameters as plans evolve, (8) volatility of commodity prices, (9) dependence on regulatory approvals and changes in legislation, environmental compliance, community support and the political and economic climate, (9) availability of future financing, and (10) exploration risk and other factors beyond the control of U3O8 Corp. including those factors set out in the "Risk Factors" in our Annual Information Form available on SEDAR at [www.sedar.com](http://www.sedar.com). Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. U3O8 Corp. assumes no obligation to update such information, except as may be required by law.*
