

Press Release

U308 Corp. announces board changes

TORONTO, Ontario – November 6, 2014 – **U308 Corp. (TSX: UWE; OTCQX: UWEFF)** (the “Company”), a Canadian-based company focused on exploration and development of uranium resources and associated commodities in South America, announces that Stewart Taylor, President of Mega Uranium Ltd., has resigned as a director effectively immediately. In addition, Richard Spencer, U308 Corp’s President and CEO, has been appointed to the Board of Directors.

“On behalf of U308 Corp. and the board, I thank Stewart for his technical expertise and guidance in the past four years since we acquired Mega Uranium’s South American assets. And we are pleased to welcome Richard to the board, who has led the company in completing preliminary economic assessments on the two principle projects acquired from Mega that show both projects would have production costs in the lower quartile of the uranium industry, which bodes well for their future development,” said Mr. David Constable, U308 Corp’s Chairman.

About U308 Corp.

U308 Corp. is focused on exploration and development of uranium resources and associated commodities in South America. The company’s uranium resources comprise three deposits defined in accordance with National Instrument 43-101 located in Colombia, Argentina and Guyana:

- **Berlin Deposit, Colombia** – a preliminary economic assessment (“PEA”) shows that Berlin could be a zero cash cost uranium producer thanks to revenue from by-products of phosphate, vanadium, nickel, rare earths (yttrium and neodymium) and other metals occurring in the same deposit;
- **Laguna Salada Deposit, Argentina** – a recent PEA shows near surface, free-digging uranium, vanadium deposit is potentially amenable to low-cost mining and processing methods; and
- **Kurupung Deposit, Guyana** – an initial uranium deposit in a large emerging uranium district.

Forward-Looking Statements

Certain information in this release are forward-looking statements with respect to the development plans, economic potential and growth targets of U308 Corp’s current projects. Forward-looking statements consist of statements that are not purely historical, including statements regarding beliefs, plans, expectations or intentions for the future, and include, but not limited to, statements with respect to: (a) the low-cost, near-term production goal of Laguna Salada, (b) the Laguna Salada and Berlin PEAs, (c) the market opportunities for uranium in Argentina and internationally, and (d) the potential of the Kurupung district in Guyana.

Basis for such assumptions include that: (i) actual results of our exploration, resource goals, metallurgical testing, economic studies and development activities will continue to be positive and proceed as planned, and assumptions in the Laguna Salada and Berlin PEAs prove to be accurate, (ii) requisite regulatory and governmental approvals will be received on a timely basis on terms acceptable to U3O8 Corp., and (iii) economic, political and industry market conditions will be favourable. However, such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements, including, but not limited to: (1) that a mine will be achieved on the Laguna Salada Project in compliance with current Chubut mining law, (2) that a mine will be achieved on the Berlin Deposit and other exploration projects, (3) that beneficiation test work will continue to be favourable and results from small scale metallurgical testing can be duplicated on a larger scale, (4) the inherent uncertainties and speculative nature associated with exploration results, resource estimates, potential resource growth, future metallurgical test results, changes in project parameters as plans evolve, (5) volatility of commodity prices; (6) dependence on regulatory approvals and changes in legislation, environmental compliance, community support and the political and economic climate, (7) availability of future financing, and (8) exploration risk and other factors beyond the control of U3O8 Corp. including those factors set out in the "Risk Factors" in our Annual Information Form available on SEDAR at www.sedar.com. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. U3O8 Corp. assumes no obligation to update such information, except as may be required by law. For more information on the above referenced PEAs, refer to the September 18, 2014 technical report titled "Preliminary Economic Assessment of the Laguna Salada Uranium-Vanadium Deposit, Chubut Province, Argentina" and the January 18, 2013 technical report titled "U3O8 Corp. Preliminary Economic Assessment on the Berlin Deposit, Colombia."
